A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 12, 2007 has been entered.

Applicant argues that March et al forms a channel completely through the sclera, and that it would not be obvious to modify March et al to form a channel only partially through the sclera. The examiner notes that the treatment of March after, for example the first 10 shots (i.e. prior to the endpoint of the treatment) reads on the instant claims. Further, it is noted that March et al, at page 586, column 2, the first sentence, discusses prior art procedures which do not create "a complete scleral perforation" when treating glaucoma. These procedures read on the instant claims.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It is a copy of the oath submitted in the parent case, when the instant application is not a continuation of the parent case.

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention: the use of a laser. A supplemental oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which

Art Unit: 3735

it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 40-59 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by March et al.

March et al teach removing scleral tissue by irradiating it with a laser to treat glaucoma, and that prior art laser procedures to treat glaucoma did not create "a complete scleral perforation". Stedman's Medical Dictionary defines ablate as "to remove"; abrade as "to wear away by mechanical action"; and incise as "to cut with a knife" since the laser produces no mechanical action per se and is not a knife per se, abrade will be construed to indicate wearing away by action of the light and incise will be construed to indicate cutting by action of the light. Since the laser burns through the sclera at the treatment site, there must be some tissue interposed the margin of the treatment site and the boundary beyond which the scleral tissue is not affected by the treatment wherein the collagen fibers are partially decomposed.

Applicant's arguments filed April 12, 2007 have been fully considered but they are not persuasive. The arguments are not persuasive for the reasons set forth above.

Applicant's arguments with respect to claims 45-59 have been considered but are moot in view of the new ground(s) of rejection.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under

Art Unit: 3735

37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
